Histeridae is a family of beetles commonly known as Clown beetles or Hister beetles. This very diverse group of beetles contains 3,900 species found worldwide. They can be easily identified by

their shortened elytra that leaves two of the seven tergites exposed, and their elbowed antennae with clubbed ends. These predatory feeders are most active at night and will fake death if they feel ...

Histeridae - Wikipedia

Creodonta is an extinct, potentially polyphyletic order of carnivorous mammals that lived from the Paleocene to the Miocene epochs. Because they both possess carnassial teeth, creodonts and carnivorans were once thought to have shared a common ancestor, but given that different teeth are involved in making up the carnassials (both between creodonts and carnivorans and between the main groups ...

The ELA Frameworks have been designed to give educators an idea of what instruction across one year might look like in any one grade level. These units are also designed to: 1) demonstrate how all of the standards are introduced and revisited within one year and 2) demonstrate how the reading, writing, and listening/speaking/viewing standards are integrated within a single unit of study.
