Watson is a question-answering computer system capable of answering questions posed in natural language, developed in IBM's DeepQA project by a research team led by principal investigator David Ferrucci. Watson was named after IBM's first CEO, industrialist Thomas J. Watson.. The computer system was initially developed to answer questions on the quiz show Jeopardy!

Watson (computer) - Wikipedia

You don't need to hold down the power button to turn on the computer. You should hear the computer's internal fan and disk drive begin spinning; after a few seconds, your computer's monitor will also light up and display either the start-up screen or the login screen, depending on whether the computer was off or sleeping.
