The von Neumann architecture—also known as the von Neumann model or Princeton architecture—is a computer architecture based on a 1945 description by the mathematician and physicist John von Neumann and others in the First Draft of a Report on the EDVAC. That document describes a design architecture for an electronic digital computer with these components:

An architectural pattern is a general, reusable solution to a commonly occurring problem in software architecture within a given context. Architectural patterns are similar to software design patterns but have a broader scope. The architectural patterns address various issues in software engineering, such as computer hardware performance limitations, high availability and minimization of a ...

Organic Farming. Fortunately, there is a more natural and humane way to raise farm animals, and there is a movement regarding it which is called "Organic farming". What it means is that farmers and hopefully food companies engage in unharmful and responsible tactics to raise animals from birth to slaughter or sell.
