Bacteria And Viruses Work Sheet Answer Key

Virus classification is the process of naming viruses and placing them into a taxonomic system. Similar to the classification systems used for cellular organisms, virus classification is the subject of ongoing debate and proposals. This is mainly due to the pseudo-living nature of viruses, which is to say they are non-living particles with some chemical characteristics similar to those of life ...

Virus classification - Wikipedia

Classification of Viruses In 1962, Lwoff, Horne and Tournier proposed a classification system in which viruses were grouped by shared characteristics among the particles themselves rather than the host cells. While their classification system is no longer used, this basic premise is the foundation of modern classification systems.

SparkNotes: Viruses: Classification of Viruses

An RNA virus that reproduces by transcribing its RNA into DNA and then inserting the DNA into a cellular chromosome; an important class of cancer-causing viruses. Reverse Transcriptase An enzyme encoded by some certain viruses (retroviruses) that uses RNA as a template for DNA synthesis.
