The history of chemistry represents a time span from ancient history to the present. By 1000 BC, civilizations used technologies that would eventually form the basis of the various branches of chemistry. Examples include extracting metals from ores, making pottery and glazes, fermenting beer and wine, extracting chemicals from plants for medicine and perfume, rendering fat into soap, making ...

Key Concepts. Melting is a process that causes a substance to change from a solid to a liquid. Melting occurs when the molecules of a solid speed up enough that the motion overcomes the attractions so that the molecules can move past each other as a liquid.

Changing State—Melting | Chapter 2: States of Matter ...

Note: Energy can also be transferred through radiation and convection, but this chapter only deals with heat transfer through conduction.. Engage Discuss what happens when a spoon is placed in a hot liquid like soup or hot chocolate. Ask students: Did you ever put a metal spoon in hot soup or hot chocolate and then touch the spoon to your mouth?
