need help building a cladogram the characters are a sponge, jellyfish, flatworm, earthworm, snail, fruitfly, starfish and human....the things they may have in common are cells with flagella, symmetry, bilat symmetry, mesoderm, head develops first, anus develops first, segmented body, calcified shell, chitinous exoskeleton, water vascular system, vertebrae

need help building a cladogram the characters are a sponge ...

Cladograms Cladograms are constructed using a method known as 'cladistics'. This method analyzes a collection of heritable character data compiled by a researcher (morphology and/or DNA). This method groups taxa based on the number of characters that they share with one another. Cladograms Cladograms are evolutionary tree diagrams that

Cladograms - Integrative Biology

Biology . Making Cladograms. Cladograms are diagrams that depict the evolutionary relationships between different groups of taxa (plural of taxon) called clades. By depicting these relationships, cladograms reconstruct the evolutionary history AKA phylogeny of the taxa. Cladograms can also be called "phylogenies" or "trees".

Biology Making Cladograms - Mr. Ulrich's Land of Biology

I really enjoy biology. I am also thinking about majoring in biology in college, Im not sure yet what I would want to do with that degree but I will look further into it as the time gets closer. Biology has been hard for me throughout the year so one of my goals is to pass biology with a C or higher Online homeschooling in Texas
