Did a lab this week testing current and voltage drop using 3 resists in series, parallel and combination. Resistor values: 146.6, 1132, 3950 ohms. Voltage from power supply: 6V We measured total current through each circuit type and voltage. For series, we measured total current as 1.15 A. For parallel, 45.2 A. For combination, 5.82 A. I am going back through the lab now and am struggling with ...
