Rotten potatoes have a distinctive unpleasant odour, and I can't find any definitive answer as to what the chemical involved is. I was thinking it might be Butyric acid, from the fermentation of the starch, but according to Wikipedia:. Butyric acid is present in, and is the main distinctive smell of, human vomit.

I have an excel sheet that looks like this: I want a function that will tell me the percentage of each response. So 36% blue, 27% red, etc. I found this article that shows how to do this kind of thing, but only with a yes/no answer. I want to be able to calculate it, so that if I add another row, and the next person's favourite colour is purple, it will include that in the response.
