Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

In a recent review published in Nature Reviews Chemistry, Cronin group researchers describe how machine learning, coupled with real-time chemistry, is set to change the way chemists discover molecules, reactions and reactivity, as well as removing researcher bias. The systems discussed would remove the need to have an biased human chemist making judgements, in favour of searching chemical space ...
