I'm reading Stephen Kochan's "Programming in Objective-C" (I'm n0000b). Everything has been obvious to me until exercise 4-8. It asks me to modify methods, in an "Accumulator" class created earlier in the chapter, to "return" the value of the accumulator when one of the math methods is used (basically it's a calculator).

objective-c: return value - Stack Overflow

This book signalled a significant development in Popper's thought to advance the twin themes of evolution and objective knowledge. This added a great deal of depth to the "objective turn" in his work.

Reading guide to Popper's Objective Knowledge

Link to Departments website. The major in Accounting at UGA is designed to give students an understanding of the theory of accounting as it is used in our society: accounting standards, financial statement preparation, product costs, budgeting, taxation, auditing, risk assessment, and controls.

Positivism is a philosophical theory stating that certain ("positive") knowledge is based on natural phenomena and their properties and relations. Thus, information derived from sensory experience, interpreted through reason and logic, forms the exclusive source of all certain knowledge. Positivism holds that valid knowledge (certitude or truth) is found only in this a posteriori knowledge.

Positivism - Wikipedia

Scientific realism is the view that the universe described by science is real regardless of how it may be interpreted.. Within philosophy of science, this view is often an answer to the question "how is the success of science to be explained?"The discussion on the success of science in this context centers primarily on the status of unobservable entities apparently talked about by scientific ...
