Anatomy & Physiology - Nervous System - The Biology Corner

190 CHAPTER 7 The Nervous System The Nervous System is Categorized by Function and Structure 191. The Nervous System is Categorized by Function and Structure. The PNS is composed of all the afferent and efferent neurons that extend from the CNS. The neurons of the PNS are arranged in bundles called nerves (Figure 7.3). Nerves can be motor, sen-

The Nervous 7 CHAPTER OUTLINE System W - UCY

The peripheral nervous system (PNS) links the CNS to the body and to the external environment. 1. The PNS detects stimuli and delivers the information to the CNS as sensory input. 2. The CNS processes the input and transmits the impulse through the PNS to cells and as motor output.
