Dalton has proposed that atoms were the smallest particles which make up matter. Then Thomson discovered the electron, which was even smaller than an atom! Thomson's experiments with cathode ray tubes helped him to discover the electron (which Dalton did not know about). Dalton thought that atoms were indivisible particles, and Thomson's discovery of the electron proved the existence of ...

If you need more space between table columns, you can use CSS margin/width properties with any value suitable for you. I would highly discourage including html visual formatting in your html code, albeit if you do, take the time to learn the meaning of some html properties, as "colspan" does not specify the width between tds, but combines them into one td.
