Like it or not, the purpose of the calculation is to provide a more accurate status bar and time estimate. Lets say you have 100 files in a directory with 99 files that are 1MB in size and 1 file that is 10GB in size, the first 99 files are copied and the status bar shows that 99% for a prolonged period of time because of the large file - most users are going to think the copy operation has ...

In spite of James's answer, I have found a few ways that it can almost be done:. By modifying the executable I can remove the trustInfo entry from the manifest (or the manifest entirely, so I can use an external one), allowing the program to start without UAC. Unfortunately this modifies the executable, so it exits shortly after due to an internal checksum test.

Hi Uri! I was talking to my husband about specific brand of milk not foaming up the other day! (I'm a big fan of coffee/cappuccino/hot chocolate with foamed milk) Since he owns a produce market, he was thinking of switching over to better/organic milk and I was telling him certain brands seem dicey 'cause it doesn't foam!!! and now you've explained the reason for us!

After yesterday's post about what determines temperature, I thought I would revisit one of the most convincing evidences of Earth's greenhouse effect.. As I've mentioned before, a handheld infrared thermometer is a great little tool to help gain physical insight into the thermal radiative (infrared) effect the atmosphere has on surface temperature.
