The evolution of mammals has passed through many stages since the first appearance of their synapsid ancestors in the Pennsylvanian sub-period of the late Carboniferous period. By the mid-Triassic, there were many synapsid species that looked like mammals. The lineage leading to today's mammals split up in the Jurassic; synapsids from this period include Dryolestes, more closely related to ...

Introduction . Conservation and Public Education . Despite their ecological value, bats are relentlessly and unjustifiably persecuted. Bats are often killed because they live near people who needlessly fear them.

Bats, Chioptera, their biology and their control

In mammals, a nipple (also called mammary papilla or teat) is a small projection of skin containing the outlets for 15–20 lactiferous ducts arranged cylindrically around the tip. Marsupials and eutherian mammals typically have an even number of nipples arranged bilaterally, from as few as two to as many as 19.. The skin of the nipple is rich in a supply of special nerves that are sensitive ...

Nipple - Wikipedia

(27) "Equipment" means any type of ground, aquatic, or aerial device used to apply any pesticide on land, and on anything that may be growing, habituating, or stored on or in the land. Equipment does not include any pressurized hand-size household device used to apply any pesticide, or any other device where the person applying the pesticide is the source of power for applying the pesticide.
