Multiplying Polynomials. Now, we get to multiplication. This problem won't quite work like addition or subtraction, and we can't use FOIL because these are larger than a binomial times a binomial!

How to Add, Subtract and Multiply Polynomials - Video ...

Least Common Multiple. The next type of word problem we will consider in this video lesson is the one involving the least common multiple, the smallest multiple shared between two numbers. For ...

Word Problems: Greatest Common Factor & Least Common ...

An algebraic fraction is the indicated quotient of two algebraic expressions. As with fractions of integers, the denominator of an algebraic fraction cannot be zero. Two examples of algebraic fractions are $\frac{1}{x}$ and $\frac{x}{x+1}$. Algebraic fractions are subject to the same field properties as arithmetic fractions. If the numerator and the denominator are polynomials, as in $\frac{1}{x}$, the algebraic ...

I'm aware of several ways that functions can be calculated, and have written my own routines to compute functions using Taylor series for fun. I'm curious about how real, production languages do it, since all of my implementations are always several orders of magnitude slower, even though I think my algorithms are pretty clever (obviously they're not).
