In physics, the wavelength is the spatial period of a periodic wave—the distance over which the wave's shape repeats. It is thus the inverse of the spatial frequency. Wavelength is usually determined by considering the distance between consecutive corresponding points of the same phase, such as crests, troughs, or zero crossings and is a characteristic of both traveling waves and standing ...

When air molecules are set to vibrate, the ear perceives the variations in pressure as sound (OTM/Driscoll). The vibrations are converted into mechanical energy by the middle ear, subsequently moving microscopic hairs in the inner ear, which in turn convert the sound waves into nerve impulses.

OSHA Technical Manual (OTM) | Section III: Chapter 5 ...

Here begins the second part of this work, which treats of the origin, history, and destinies of the two cities, the earthly and the heavenly. In the first place, Augustine shows in this book how the two cities were formed originally, by the separation of the good and bad angels; and takes occasion to treat of the creation of the world, as it is described in Holy Scripture in the beginning of ...

Page 409 feels, should exert every effort to obtain from the authorities a permit exempting them from active military service in a combatant capacity, it is their duty at the same time, as loyal and devoted citizens, to offer their services to their country in any field of national service which is not specifically aggressive or directly military.

Lights of Guidance (second part) - Baha'i Library

Digital Signal Processing is distinguished from other areas in computer science by the unique type of data it uses: signals. In most cases, these signals originate as sensory data from the real world: seismic vibrations, visual images, sound waves, etc. DSP is the mathematics, the algorithms, and the techniques used to manipulate these signals after they have been converted into a digital form.

These Habits of Mind seldom are performed in isolation; rather, clusters of behaviors are drawn forth and used in various situations. For example, when listening intently, we use the habits of thinking flexibly, thinking about our thinking (metacognition), thinking and communicating with clarity and precision, and perhaps even questioning and posing problems.
