The data compilations presented in Figure 2-3 and Figure 2-4 also include mine water qualities not resulting from sulphide oxidation. However, the fields for ARD, NMD, and SD are drawn so that this nomenclature covers the entire range of water qualities observed, including water types that may deviate from the proper definitions.

Chapter 2 - GARDGuide

What is Human Ecology? Ecology is the science of relationships between living organisms and their environment. Human ecology is about relationships between people and their environment. In human ecology the environment is perceived as an ecosystem (see Figure 1.1). An ecosystem is everything in a specified area - the air, soil, water, living organisms and physical structures, including ...

Restoration ecology is the scientific study supporting the practice of ecological restoration, which is the practice of renewing and restoring degraded, damaged, or destroyed ecosystems and habitats in the environment by active human intervention and action.. Natural ecosystems provide ecosystem services in the form of resources such as food, fuel, and timber; the purification of air and water ...

Restoration ecology - Wikipedia

Ecology is a new science and considered as an important branch of biological science, having only become prominent during the second half of the 20th century. Ecological thought is derivative of established currents in philosophy, particularly from ethics and politics. Its history stems all the way back to the 4th century.

History of ecology - Wikipedia

Vladimir Antonov was born in 1946 in Saint Petersburg, Russia. After graduating from the Saint Petersburg State University as a bio-ecologist, he worked for many years in such fields of science as biology, medicine, ecology.
