The inner ear consists of the cochlea and several non-auditory structures. The cochlea has three fluid-filled sections (i.e. the scala media, scala tympani and scala vestibuli), and supports a fluid wave driven by pressure across the basilar membrane separating two of the sections. Strikingly, one section, called the cochlear duct or scala media, contains endolymph.

Lateral violence is a multilayered, complex problem and because of this our strategies also need to be pitched at different levels. In Chapter 3 I have looked at the big picture, with the human rights framework as our overarching response to lateral violence. In this Chapter I will be taking our strategies to an even more practical level, looking at how we can create environments of cultural ...
