XtraMath ® helps students transition from counting or calculating the basic math facts to recalling them. Quickly recalling math facts, instead of calculating them, frees up mental resources for higher-level operations. XtraMath's timed activities encourage students to answer questions as quickly as possible.

Not all mathematics discussions are alike. It's one thing to ask students to share how they solved a problem, to get ideas out on the table so that their thinking becomes visible; but knowing what to do with students' ideas—where to go with them—can be a daunting task. Intentional Talk provides teachers with a framework for planning and facilitating purposeful mathematics discussions that ...

material added 17 February 2001. Erich Friedman made a page about Circles through Points. David Eppstein (Geometry Junkyard) suggested combining these problems. What is the fewest number of continuous arcs needed to pass through a grid of points?

Solution - math puzzle

for and is the Riemann zeta function (Hardy and Wright 1979, p. 255).. The values of the first integers are plotted above on a grid, with squarefree values shown in white. Clear patterns emerge where multiples of numbers each share one or more repeated factor. There is no known polynomial time algorithm for recognizing squarefree integers or for computing the squarefree part of an integer.
