This is a collection of worked general chemistry and introductory chemistry problems, listed in alphabetical order. I have included printable pdf chemistry worksheets so you can practice problems and then check your answers. You may also browse chemistry problems according to type of problem.

Worked Chemistry Problems and Worksheets - ThoughtCo

The order of reactivity can be used to predict what will happen when a metal is placed in a solution of another metal. For example, when magnesium ribbon is placed in a solution of copper(II) sulfate, the blue colour of the copper ion fades fast and a reddish-brown coating appears on the surface of the zinc copper.
