Human evolution is the evolutionary process that led to the emergence of anatomically modern humans, beginning with the evolutionary history of primates—in particular genus *Homo*—and leading to the emergence of *Homo sapiens* as a distinct species of the hominid family, the great apes. This process involved the gradual development of traits such as human bipedalism and language, as well as ...

CHAPTER FIVE - DETERMINING THE SENTENCE Introductory Commentary. The U.S. Sentencing Commission is an independent agency in the judicial branch that was created as part of the Sentencing Reform Act of 1984.

2015 Chapter 5 | United States Sentencing Commission

Evolution is a scientific theory used by biologists. It explains how living things change over a long time, and how they have come to be the way they are.. Earth is very old. By studying the layers of rock, we can find out about its past. That kind of research is called historical geology.. We know that living things have changed over time, because we can see their remains in the rocks.
