(Examples: straining cooked pasta to get the liquid out, using a fuel cell to separate water into hydrogen and oxygen) a) Physical methods of separation (filtering, distillation) do not require a chemical change. In other

### **Classification of Matter C1Y vM2 - WordPress.com**

Homogeneous and heterogeneous: it's a matter of phases. A sample of matter can contain more than a single phase; a cool drink with ice floating in it consists of at least two phases, the liquid and the ice. If it is a carbonated beverage, you can probably see gas bubbles in it that make up a third phase.
