MySQL. Databases can become huge and unwieldy very quickly. Demands on database administrators are great; not only do you have to provide a huge amount of data to customers, but you also need to ...

How to Copy Data Between Tables in MySQL Databases - Video ...

The line `bar = foo` does not copy the contents of the variable, only its "object reference". To understand what is going on here, we need to know how lists are stored in the computer's memory. In 4.1, we see that a list `foo` is a reference to an object stored at location 3133 (which is itself a series of pointers to other locations holding strings). When we assign `bar = foo`, it is just the ...
