The correct option is C. During ordinary chemical reactions, energy may be released into the environment or absorbed from the environment. The type of chemical reaction that release energy into the environment is called exothermic reaction while the one that takes energy from the environment is called endothermic reaction.

Ray Palmer x Reader The crew found your inability to drop certain childhood habits amusing. It didn't matter that you were able to feel the most minute of cellular processes in a human (or sometimes non-human) body with just the brush of skin on skin, it was very hard to shake the need to give a kiss or "sana sana" when there was an injury or malady.
