Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics of distributed ...

Three holes were drilled through the glass lid. The first hole (~25 mm) located in the center of the lid was designed for safe gas and digestate sampling as well as temperature and dissolved O₂ (DO) monitoring. The second hole (~3 mm diameter) located on the side of the lid and plugged by a Thermogreen septum was used for gas (VOCs) sampling.
