### Solubility Temperature Graphs Chapter 14 Answers

Use the provided solubility graph to answer the following questions: For questions 1 – 4 an amount of solute is given, and a temperature is stated. If all of the solute could be dissolved in 100 g of water at the given temperature, would the resulting solution be unsaturated, saturated, or supersaturated?

### Use the provided solubility graph to answer the following ...

The solution is allowed to cool. At what new temperature would crystals begin to start forming? Solubility Graph Worksheet. Refer to the graph to answer the following questions? Why do the temperatures on the graph only go from 0°C to 100 °C? Which substance is most soluble at 60°C? Which two substances have the same solubility at 60 °C?

### Solubility Graph Worksheet - Socorro Independent School ...

Solubility graphs represent the relationship between solubility (in grams of solid per volume of water) vs temperature. If the solution is above the solubility line it is supersaturated and below the solubility line it is unsaturated. Points along the line are points of saturation.
