Some key ethical issues facing contemporary society include how to provide welfare and charity support to the poor, how to deal with addiction, whether to permit euthanasia, how to treat animals and the environment and what stance to take on population control.

What Are Some Key Ethical Issues Facing Contemporary ...

In this article, you can learn about laboratory-developed tests, also called "LDTs", that are developed, evaluated, and validated within one particular laboratory. They are not distributed or sold to any other labs or healthcare facilities to perform on their own. Often, a lab will choose to develop and use an LDT because a commercial test is not currently available.

A urinalysis is a group of physical, chemical, and microscopic tests. The tests detect and/or measure several substances in the urine, such as byproducts of normal and abnormal metabolism, cells, cellular fragments, and bacteria.. Urine is produced by the kidneys, two fist-sized organs located on either side of the spine at the bottom of the ribcage.
