A substance that changes form has undergone a physical change, which might be reversible. A substance that transforms into a different substance has undergone a chemical change, which is harder to ...

## **Comparing Reversible & Irreversible Physical & Chemical ...**

What is a physical change in matter? Molecules can move from one physical state to another (phase change) and not change their atomic structure. Oxygen (O<sub>2</sub>) gas has the same chemical properties as liquid oxygen. The liquid state is colder and denser (less energy), but the molecules are the same.

What Is Magnesium? Magnesium is an essential mineral, meaning that it can't be made by the body, so instead, we have to get it from food. This often overlooked mineral is involved in over 300 biochemical reactions in the body (2). It plays important roles in energy production, muscle contraction, DNA synthesis, neurological function, and bone structure.
