Chapter 19 - Pain . Pain is the most common symptom bringing patients to medical attention. The objectives of this discussion are to describe the evaluation of the patient with pain and to discuss the different types of pain and their management from a neurologic perspective.

Chapter 19 - Pain - Dartmouth College

Neuroregeneration refers to the regrowth or repair of nervous tissues, cells or cell products. Such mechanisms may include generation of new neurons, glia, axons, myelin, or synapses. Neuroregeneration differs between the peripheral nervous system (PNS) and the central nervous system (CNS) by the functional mechanisms and especially the extent and speed.

Neuroregeneration - Wikipedia

On a typical day, the average adult will take in about 2500 mL (almost 3 quarts) of aqueous fluids. Although most of the intake comes through the digestive tract, about 230 mL (8 ounces) per day is generated metabolically, in the last steps of aerobic respiration.
