Reactions between an acid and base generally result in the formation of a salt and water. However, reactions between some acids and bases do not result in complete neutralization and some left over reactants may be present with the products. Some reactions also yield a gas as one of the products.

What Products Does One Get When Mixing an Acid & With a ...

Simply put, the commutative property of multiplication means that no matter how you order the numbers you are multiplying, you will get the same answer. Addition also shares the commutative property with multiplication, whereas division and subtraction do not. For example, if you multiply 3 by 5 or 5 by 3, you will get the same answer of 15.

Commutative Properties of Multiplication | Sciencing

Chem1 Tutorial on chemistry fundamentals Part 4 of 5. Basically, this means that chemical equations must be consistent with the law of conservation of mass. In the context of an ordinary chemical reaction, conservation of mass means that atoms are neither created nor destroyed.

Chemical Equations and Calculations

Topic 2 – States of matter and mixtures (Edexcel 9-1 GCSE Chemistry 1, Paper 1, Topic 2 "States of matter and mixtures"). Edexcel GCSE 9-1 Chemistry 1 Topic 2 "States of Matter" quiz questions content: state changes, particle models, methods of separating mixtures, test for purity (need more questions on separating mixtures and purifying water)
