Preface. This is the preprint of an invited Deep Learning (DL) overview. One of its goals is to assign credit to those who contributed to the present state of the art. I acknowledge the limitations of attempting to achieve this goal.

Deep learning in neural networks: An overview - ScienceDirect

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.

J Sidlow Baxter (Explore the Bible) - Even in the best art galleries there is always a space for choice miniatures. This personal note from Paul to Philemon is such a graceful little masterpiece of "fine courtesy, exquisite tact, and even playfulness of wit," and withal it has such distinct spiritual values, that one can only wonder sadly at those who have begrudged it the little niche which ...
