KLB Science Interactivities - The Circulatory System

A heart attack can be predicted months in advance, if not years in advance. If a patient is having symptoms of angina, which is usually pressure in the chest but may include discomfort in the chest, neck, arm or stomach area and may be associated with nausea or sweating, one should think of heart disease and an impending risk of heart attack.

Introduction. Students should complete the Know Your Organ Systems student sheet to learn how each system functions. Here are the answers. 1. Circulatory (b)

Know Your Organ Systems - Answers - Science NetLinks

Note: Students should focus on the fact that systems work together not necessarily on the names of each organ. Assessment. The main point of this lesson is to understand that there are different systems within the human body and that these systems work independently and together to form a functioning human body.
