After completing this tutorial, you should be able to: Know what a linear equation is. Know if a value is a solution or not. Use the addition, subtraction, multiplication, and division properties of equalities to solve linear equations.

www.wtamu.edu

In this section we solve linear first order differential equations, i.e. differential equations in the form $y' + p(t)y = g(t)$. We give an in depth overview of the process used to solve this type of differential equation as well as a derivation of the formula needed for the integrating factor used in the solution process.
