A race is a grouping of humans based on shared physical or social qualities into categories generally viewed as distinct by society. First used to refer to speakers of a common language and then to denote national affiliations, by the 17th century the term race began to refer to physical (phenotypical) traits. Modern scholarship regards race as a social construct, an identity which is assigned ...

The history of hydraulic systems can be traced back to the 1646, when Braise Pascal performed the first hydrostatic experiment. He used a Pascal's barrel to investigate the effect of a force applied at one point of the fluid and how it is transmitted to the other sections within an enclosed system. The outcome of his experiments resulted in a scientific law/principle called Pascal Law or ...
