Force, Motion and Gravitation - MCAT Review

Each interactive concept-builder presents learners with carefully crafted questions that target various aspects of a discrete concept. There are typically multiple levels of difficulty and an effort to track learner progress at each level. Question-specific help is provided for the struggling learner; such help consists of short explanations of how to approach the situation.

Graph That Motion - physicsclassroom.com

physics. Want to know why and how matter and energy behave the way they do? From the structure of atoms to the properties of heat, light, and sound, we explain physics in plain English.

Physics Study Guides - SparkNotes

Newton's law of universal gravitation states that every particle attracts every other particle in the universe with a force which is directly proportional to the product of their masses and inversely proportional to the square of the distance between their centers. This is a general physical law derived from empirical observations by what Isaac Newton called inductive reasoning.
