Answers from doctors on labcorp beacon results. First: Of BUN and creatinine? Ratios often distort the meaning of raw values. All laboratory results need to be interpreted in the clinical context and the doctor who ordered the tests is usually in the best position to do that. Having said that one needs to know the actual values to provide an opinion.

When the molecules of the crystal come together, impurities (which are the unwanted products of the chemical reaction) do not fit into the structure, much like the wrong piece of a puzzle does not fit. So, if the crystal forms slowly enough, the impurities will be rejected because they do not fit correctly, and instead, remain in the solution and float away.
