THE MOST IMPORTANT INDEPENDENT VARIABLES IN FERMENTATION. There are two key independent variables worth considering: (a) Sugar concentration. After crushing the grapes the next step in the making of wine is the fermentation of the grape juice and pulp with various yeasts

and bacteria.

### **Senior Chemistry - Extended Experimental Investigations**

Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

1. Introduction. Over the last few years, occasional popular press articles have reported about the interest of winery owners from the well established Champagne region in purchasing land in more Northern regions, specifically England (Jones, 2004). While there is no indication for the migration of entire winemaking regions into more temperate climates because of climate change, it is ...
