1. Introduction. CO<sub>2</sub> emissions into atmosphere is a global concern and a recent theoretical model provides a quantitative approach for its connection with global warming and climate change .Combustion stoichiometry gives that burning 1 ton of carbon in fossil fuels results more than 3.5 tons of CO<sub>2</sub>; whose accumulation in the atmosphere is now approaching 1 tera ton .

Introduction. Catalytic processes are a central technology for a sustainable future. By lowering the energy required for the production and separation of chemicals, and by reducing the emission of pollutants and greenhouse gases, catalytic processes have been crucial in providing and utilizing chemicals at lower environmental cost.

### **Colloidal nanocrystals for heterogeneous catalysis ...**

Comparison with mass. Matter should not be confused with mass, as the two are not the same in modern physics. Matter is a general term describing any 'physical substance'.By contrast, mass is not a substance but rather a quantitative property of matter and other substances or systems; various types of mass are defined within physics – including but not limited to rest mass, inertial mass ...
