Phylogeny and Systematics – Chapter 25. Phylogeny – Systematics – Molecular systematics - I. Common ancestries are revealed by the fossil record, and morphological and molecular evidence. To infer phylogeny we use information from the fossil record, morphology, development and biochemistry. Fossils also reveal characteristics that may ...

Chapter 25. Phylogeny & Systematics An unexpected family tree. What are the evolutionary relationships among a human, a mushroom, and a tulip? Molecular systematics has revealed that—despite appearances—animals, including humans, and fungi, such as mushrooms, are more closely related to each other than either are to plants.
