Design constraints on a computer's memory can be summed up by three questions: How much, how fast, how expensive There is a trade-off among capacity, access time, and cost Faster access time, greater cost per bit Greater capacity, smaller cost per bit Greater capacity, slower access time The way out of the memory dilemma is not to rely on a ...

William Stallings Computer Organization Dr. George Lazik ...

The purpose is to design a computer that maximizes performance while keeping power consumption in check, costs low relative to the amount of expected performance, and is also very reliable. For this, many aspects are to be considered which includes instruction set design, functional organization, logic design, and implementation.
