suspicious. The "optimal" solutions presented are usually not numerically optimal and are merely close enough to optimal to be good enough for engineering purposes. This reflects the optimization philosophy described in Chapter 12. When teaching design, I usually do not give the teaching assistants prepared solutions to the homework problems.

If there is no chemical reaction the number of independent components is equal to the number of distinct chemical species present. Consider the production of a nitration acid by mixing 70 per cent nitric and 98 per cent sulphuric acid. The number of distinct chemical species is 3; water, sulphuric acid, nitric acid.
