The Student's t-test is a statistical test that compares the mean and standard deviation of two samples to see if there is a significant difference between them. In an experiment, a t-test might be used to calculate whether or not differences seen between the control and each experimental group are a factor of the manipulated variable or simply the result of chance.

This article directly addresses the scientific evidences in favor of macroevolutionary theory and common descent. It is specifically intended for those who are scientifically minded but, for one reason or another, have come to believe that macroevolutionary theory explains little, makes few

or no testable predictions, or cannot be falsified.

AET 101 Internal Combustion Engine Theory and Servicing. This is a theory/laboratory course designed to introduce the student to basic heat engine types, their physical configurations and various engine operating cycles.

Course Listing - Farmingdale State College

Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on Earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created Earth's biodiversity.

Los caracteres no hacen al género, el género nos da sus caracteres. - Carlos Linneo (1751 :119)
Con estas palabras, Linneo reconocía que las especies se agrupaban de forma diferente si se elegían caracteres diferentes para diferenciarlas, pero había "algo más" que la mera similitud de caracteres que agrupara a las especies en un mismo género, y había que saber elegir los caracteres a ...
