Computer Networking By Kurose Ross
A computer network is a digital telecommunications network which allows nodes to share resources. In computer networks, computing devices exchange data with each other using connections between nodes.These data links are established over cable media such as wires or optic cables, or wireless media such as Wi-Fi.. Network computer devices that originate, route and terminate the data are called ...

In telecommunication and computer engineering, the queuing delay or queueing delay is the time a job waits in a queue until it can be executed. It is a key component of network delay.In a switched network, queuing delay is the time between the completion of signaling by the call originator and the arrival of a ringing signal at the call receiver.
