The main difference between the IN and EXISTS predicate in subquery is the way in which the query gets executed. IN -- The inner query is executed first and the list of values obtained as its result is used by the outer query.The inner query is executed for only once.

What is the main difference between the IN and EXISTS ...
Architecture Overview. LoadRunner works by creating virtual users who take the place of real users operating client software, such as Internet Explorer sending requests using the HTTP protocol to IIS or Apache web servers.. Requests from many virtual user clients are generated by "Load Generators" in order to create a load on various servers under test

In my mind, there is a minimum level of quality that a homemade chocolate chip cookie should at least meet. Because the recipe is so widely available, there really isn't an excuse (unless you are experimenting in an attempt to develop a better recipe) for anyone to make a chocolate chip cookie that is worse than the Nestlé® Toll House® Chocolate Chip Cookie.
