In computer science, a lock or mutex (from mutual exclusion) is a synchronization mechanism for enforcing limits on access to a resource in an environment where there are many threads of execution.A lock is designed to enforce a mutual exclusion concurrency control policy.

Lock (computer science) - Wikipedia

A compiler is a computer program that translates computer code written in one programming language (the source language) into another programming language (the target language). The name compiler is primarily used for programs that translate source code from a high-level programming language to a lower level language (e.g., assembly language, object code, or machine code) to create an ...

Subversion is a free/open source version control system (VCS). That is, Subversion manages files and directories, and the changes made to them, over time. This allows you to recover older

versions of your data or examine the history of how your data changed.

Version Control with Subversion
Hi there, I own a Samsung ATIV SE that has the optional pre-developers update. My problem is after an average of 8 times I ve put my phone to sleep and awoken it, it doesn t let me scroll or use any touch screen abilities making my phone useless and only letting me change volume.
