Distributed computing is a field of computer science that studies distributed systems. A distributed system is a system whose components are located on different networked computers, which communicate and coordinate their actions by passing messages to one another. The components interact with one another in order to achieve a common goal. Three significant characteristics of distributed ...

1. Introduction. Traditional security mechanisms alone, such as cryptographic techniques , are not enough to preserve data integrity in this enormous scale, thus seriously restricting the adoption of IoT in the future.The Internet, on which IoT is based, is inherently insecure, where data security was an afterthought in the design, as can be evident from continual patches and manual handling .

Admittedly a prosaic concept, research impact can be roughly divided into academic and non-academic dimensions. Academic research impact is often (over)simplified to mere citations—an impactful article is well cited and utilized by others, with citation counts being offered by Google Scholar, Scopus, or ISI Web of Science.
