In a previous article, we talked about the background of the chi-square test of independence and how it can address common business analytics problems. In this article, we demonstrate the actual usage with an example. Remember that the chi-square test of independence helps to find out if two business parameters, X and Y, are related to or are independent of each other.

Early life. Hồ Chí Minh was born as Nguyễn Sinh Cung in 1890 in the village of Hoàng Trù (the name of the local temple near Làng Sen), his mother's village. Although this is his generally accepted birth year, at various times he used five different birth years: 1890, 1891, 1892, 1894 and 1895. From 1895, he grew up in his father Nguyễn Sinh Sắc (Nguyễn Sinh Huy)'s village of ...

Multicollinearity occurs when independent variables in a regression model are correlated. This correlation is a problem because independent variables should be independent.If the degree of correlation between variables is high enough, it can cause problems when you fit the model and interpret the results.
