- During your critical thinking processes, there are several pitfalls you might fall into. But you can avoid them. The most common pitfall is jumping to answers too quickly. You think you know what the problem is, and you rush off to solve it. Some of the tools you can use to avoid that pitfall are first: defining your problem well, having that clear problem statement.

ED25519 SSH keys. Following best practices, you should always favor ED25519 SSH keys, since they are more secure and have better performance over the other types.. They were introduced in OpenSSH 6.5, so any modern OS should include the option to create them. If for any reason your OS or the GitLab instance you interact with doesn't support this, you can fallback to RSA.
